To Whom It May Concern

Re: Reference for Jon Seidel / EDP Consulting Inc.

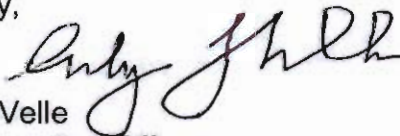

I have worked with Jon Seidel and his company, EDP Consulting Inc., over the past four and half years on our IT development needs at Arborwell. Some of the projects he has completed for us are:

- Consulting and special programming to support the implementation of our automated timekeeping system.
- Researching ad-hoc reporting solutions to enhance our canned report selection.
- Development of special reports for sales and financial analysis.
- Customization of screens for our service industry and financial software.

Jon's greatest benefit to our company has been his proactive approach. I am by no means savvy when it comes to IT and Jon has offered solutions that would not have even crossed my mind otherwise. The depth and range of support has made a significant impact on the accountabilities and efficiencies of our organization.

If you have any other questions regarding my experience working with Jon, I would be happy to speak with you. Feel free to contact me either via email or my office phone listed below.

Sincerely,

Andy LaVelle
Chief Operating Officer
